

Podcast Setup Program with Mike Stewart WebsitesYouControl.com – PodcastInstall.com

1. Purchase a dedicated domain and Wordpress hosting for your podcast. Domains are \$13.97 per year and hosting is \$15 per month or \$203 per year
2. I have a template, online training and service where I install and configure your podcast for \$397
3. I in a one on one session, install, configure your RSS feed, submit feed to podcast directories.

ITEMS YOU MUST PROVIDE BEFORE WE INSTALL AND CONFIGURE YOUR PODCAST

4. You must provide a logo, and 1400 x 1400 pixels Podcast logo. Very cheap at <http://fiverr.com> (I can help you do simple ones at <http://canva.com>)
5. You must get an Apple ID, Gmail address, Spotify Login, Stitcher Login, prior to our setup
6. You must produce at least one 44.1 16bit, Stereo 128 KBPS show, suggested no less than 5 minutes in length
7. We can start with simple Wordpress audio hosting and discuss pro options during setup. (Amazon S3, Libsyn, Podbean and Blubry options all have benefits, but have monthly fees in addition to site hosting and domain URL)

At this point, you have a podcast. Best way to explain is your URL is your world wide station call letters, (WSM, WNBC), you have a transmitter (Wordpress and hosting), you have a show, your recorded mp3. Building an audience requires time, persistence, advertising, social media posting, content marketing and more. I can help with coaching and services at \$150
